

Caution: Do not plug in the Wi-Fire until you have completed Part 1!

Part 1 - Installation

Step 1: Insert and Open the **Wi-Fire Installation CD**. Make sure the Wi-Fire is not plugged in until you complete the driver installation.

Step 2: Open **Wi-Fire Installer.exe**. On most computers the installer will open automatically.

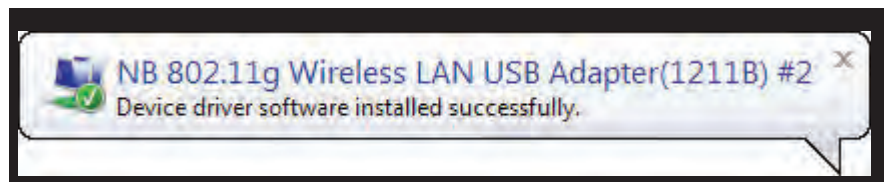

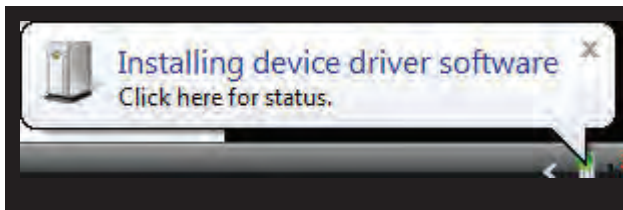

Step 3: Continue through the **Installation Wizard**, choosing your installation location and accepting the License Agreement.

Part 2 - Setup

Step 1: Plug the Wi-Fire into the computer's USB 2.0 Port

Step 2: Windows will automatically begin installing the correct drivers.

Step 3: A System Tray Dialogue will open giving you status and information about the driver installation.

**The Wi-Fire is now ready to use!
(See reverse side for usage tips.)**

Configuring Wi-Fire Connections

Opening the Wi-Fire Connection Manager

Double Click the WCM icon (looks like a lower case "h") in your system tray to open.

If the Wi-Fire Connection Manager is not already in your system tray, you can open it by browsing to: Start -> All Programs -> Wi-Fire connection Manager

Connecting

1- Double click on your target network.

2- A Profile Configuration window will open. If your network is open then just click **OK**.

3- If the network is secure, enter the security settings.

To Connect to a WPA-Enterprise (802.1x) network, you'll need to connect through the Windows interface. To do this, double click on the WiFi icon in the system tray, then enter your WPA Enterprise settings and security information when prompted.

Additional information can be found at www.hfield.com/enterprise.htm

Using the Wi-Fire

The Wi-Fire has two modes of placement: on top of any flat screen monitor, or on a flat surface such as a desktop.

The Wi-Fire is a directional WiFi adapter, so it needs to be properly oriented for best signal reception.

To find the best position, pivot and rotate the Wi-Fire while monitoring the Signal Strength Meter in the Wi-Fire Connection Manager.

The Wi-Fire can be folded up and easily placed away for convenient mobile use.
