

Wi-Fire

Reliable Wireless Connectivity for the Enterprise User

Increase Productivity, Save Money

You have people on the road everyday - sales, engineers, and executives, and every minute counts. Whether they're reviewing and sending that proposal to a customer or getting prepped for the next call, they need to stay connected at any location.

Equip your team with a **Wi-Fire™** and...

- ⊙ Help them stay connected at home and on the road
- ⊙ Reduce wireless access fees
- ⊙ Stay connected to the office seamlessly
- ⊙ Bring the power of your enterprise systems to every person in the field
- ⊙ Even fills in those deadspots back at the office and in the home

Your travelers need the power of the office infrastructure brought to them. Your Business needs the **Wi-Fire™**!

Gift Idea! Customer Promotions! Special Offers!

Need a unique promotional gift or incentive award?

Give your customers and employees a gift that won't just sit in a drawer or be tossed in the bin. Give them the **Wi-Fire™** - customized with your own Logo or Slogan prominently displayed! It's the gift that keeps on giving by providing outstanding WiFi connectivity.

Private Labeling

Want the ultimate in brand recognition?

hField Technologies now offers private labeling for large quantity orders. Have your company name molded-in the unit, and enjoy the benefits of long-range WiFi!

The Wi-Fire is a compact, range extending USB device that enables you to access a wireless Internet connection from up to 1,000 feet away—three times the range of your internal wireless adapter. The Wi-Fire uses a powerful directional antenna, highly sensitive receiver and proprietary software to find and enhance normal WiFi signals.

“I'm on the road constantly as executive vice president of a major software company. The Wi-Fire has increased my efficiency and added hours of useful time to my day.”

—Bob Sandie, Palo Alto, CA

“My clients don't care if I'm in Los Angeles or Seattle. They expect me to service their account whenever they call. I can't tell you how much more efficient I am since I got my Wi-Fire. Connecting to the Internet at high speeds means I can do my job anywhere.”

Ruth Miller, Los Angeles, CA
