

# Wi-Fire

Reliable Wireless Connectivity for the Recreational Traveler

If you're traveling for fun but want to stay in touch and online, the Wi-Fire is the ideal road companion. More and more RV parks, skilodges, beach communities, major metro areas and small towns are providing wireless access—and the Wi-Fire can improve your online experience.

With the Wi-Fire plugged into your laptop, you'll find more wireless networks and stronger signals. Share photos... stream videos...surf your favorite websites...play online games...send email...or plan your next pit stop...with the convenient high speed and high bandwidth you expect.

## Stay in Touch with Family and Friends

Just because you are on the road, doesn't mean you don't want to stay in touch and stay connected. Why spend precious vacation time searching for an Internet café or public library? Bring your own laptop and your Wi-Fire and stay connected!

Wi-Fire allows you to stay in touch with family, friends and work while on vacation. You could look around for the closest and strongest access point. You could suffer through a spotty, slow connection that drops at the most inopportune time.

Or you can plug in your Wi-Fire, see multiple hotspots you never even knew existed, and get online—now!

The Wi-Fire is a compact, range extending USB device that enables you to access a wireless Internet connection from up to 1,000 feet away—three times the range of an internal wireless adapter. The Wi-Fire uses a powerful directional antenna, highly sensitive receiver and proprietary software to find and enhance normal WiFi signals.

“The Wi-Fire really exceeded my expectations. I can also use it when on vacation at my mother's beach house. The neighbor said I could 'borrow' his wireless connection.”

—Glen Hoover, Jersey City, NJ

“We went to Jamaica with the Wi-Fire and were able to post new vacation photos to our family website every single day. It really made it easy for people back home to share the experience with us. Of course, they were all very jealous!”

—Tammy Kervan, Indianapolis, IN

“It truly is amazing that it can connect from here. I have tried degrees of swivel to 360, and there are positions where it is better than others, but it's all good! Thank you!”

—Rena Semple-Shaw, Calgary AL
